MACRO SHIFTS

Why Global Trade Is Being **Rewritten** Right Now

Supply Chain Decoupling

Post-COVID, post-geopolitical fragmentation – companies are diversifying away from single-nation dependency.

China+1 Strategy

Global corporations are actively shifting manufacturing to India, Vietnam and Mexico. India wins the most.

Energy Transition

\$3T+ invested globally in renewables. New trade corridors forming around green energy, hydrogen and solar.

Trade Bloc Realignment

BRICS expansion, RCEP, QUAD and Indo-Pacific frameworks are reshaping who trades with whom.

Digital Trade Explosion

Cross-border e-commerce is expected to hit \$4.8T by 2026. Digital services trade is growing 8% annually.

Infrastructure Race

Belt & Road, PGII, India-Middle East-Europe Corridor – nations competing to own the arteries of trade.

The rules are changing. The players are evolving. **The future is being written now.**
